TAKE 5 FOR SAFETY

5-MINUTE SAFETY DRILL

Risk Management: It's Your Call

Date:_____

Student:_____

Dept:_____

Station:_____

Training Code:_____

NOTES:

CHALLENGE

Cities continue to expand with new shopping and business areas. With land space often an issue, high rise structures are becoming more common for multi-purpose uses. In this scenario, you are responding to a major structural fire in a downtown area.. This is a total living experience building with restaurants, clothing stores, arcades, movie theaters, parking garages and other interior mall boutiques. It is close to the end of the business day. You have just arrived at the scene.

It's Your Call!

DISCUSSION

- What personnel safety issues come to mind?
- What concerns do you have about the general public and evacuation that may be necessary?
- How prepared is your department equipped to fight a fire in a populated area as well as handle the multiple exposures in this building?
- Are you prepared for high rise buildings of this height?
- Discuss how you would proceed with staging?
- You are the safety officer, what instructions do you have for your crew?
- What are your concerns as the incident commander?

The greatest asset of the fire service is our people; protect them!
